

# QUANTUM SV

Semi Vertical Chilled Display Multi Deck

Cross  
Rental  
Services

## Refrigeration & Catering

The Quantum SV is a flexible retail solution that can be used as either a stand-alone low height multideck or multiplexed together to create a 360-degree chilled island display.

At just 1465mm tall the Quantum SV is ideal for mid-store placement yet with 4 adjustable shelves + base it still has a merchandising area that defies its size.

### Key Features of Quantum SV

- \* Staggered 250/300/350mm shelving + base
- \* Slow rise night blind
- \* Digital controller

### Technical Specifications For Quantum SV

Product code	QSV14
Total length including end walls	1335 mm
Total depth including bumper	815 mm
Total depth without bumper	785 mm
Total height including feet	1465 mm
Power supply required	13 amp
Nominal power consumption	1040 Watts
